Applicant's arguments filed on 8/4/03 have been considered but are moot in view of the new ground(s) of rejection.

Claims 8,9,16,17 have been amended to overcome the 112 (second paragraph) rejections.

Claims 8-20 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cherukuri ('838).

Cherukuri teaches a chewing gum product comprising confections and a sugarless coating. Cherukuri teaches a method for applying to the gum center, a sugarless coating consisting of sweeteners such as sorbitol, mannitol (col.2, lines 60-64), from about 0.04 to about 2% of synthetic sweeteners which include cyclamate salts or free saccharin acid (col.3, lines 18-21). Cherukuri teaches that it is known in the art to apply two or more coats of each of the coating syrup and dusting mix in order to build up a desired thickness and coating weight on the gum centers (col.2, lines 14-30). As for the teaching of the product comprising a medicament, Cherukuri teaches that the

Art Unit: 1615

comestible to be coated may include medicinals in the form of tablets (col.5, lines 55-60).

Cherukuri does not teach particularly the amount of the product.

However, the particular amount of the coating would be readily determined by one skilled in art through routine experimentation. There is no patentable distinction seen over the prior art of a chewing gum product comprising a gum center and a coating which may include medicinals.

Response to Arguments

Applicant's arguments filed 8/4/03 have been fully considered ^{and} they are ^A persuasive.

Applicant argues that the prior art is completely devoid of any teaching or suggestion as to a chewing gum composition including a coating that comprises at least 50% by weight of the product. Cherukuri I does not disclose any medicament at all and Cherukuri II only teaches that the medicament should be incorporated into the gum tablet. Further, there is no disclosure or suggestion in Cherukuri that the coating comprises at least 50% by weight of the product.

In response to applicants' arguments, Cherukuri ('838) teaches that the comestible to be coated may include medicinals in the form of tablets (see col.5, lines 55-60), therefore the prior art does teach coating a composition with medicaments. Although, Cherukuri does not teach the particular amount of the coating, the motivation to use the teachings of ('838) is that the particular amount of the coating would readily be determined by routine experimentation by the skilled practitioner. Therefore, the

Art Unit: 1615

(103) art rejection over Cherukuri would have been obvious to one of ordinary skill in the art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
